Supremecoat Solar Treatment System

Why choose Supremecoat Solar treatment?

Supremecoat Solar is a specially designed solar panel coating that provides self-cleaning, protective layer that increases efficiency for your solar panels that lasts up to 4 years.

Supremecoat's Solar Panel Coating is a hard, hydrophobic, self-cleaning barrier of protection with an efficient, dust accumulation reducing function. Our solution is highly UV resistant, heat and chemical resistant, and ultra-thin (less than 1 micron).

Supremecoat Solar Treatment

How does Supremecoat Solar Work?

According to The US Department of Energy, solar panels reflecting less sunlight means a 3-6 percent increase in light-to-electricity conversion efficiency and power output of the solar cells. This solution is safe on glass, plastic or thin film panels. The water-repelling and self-cleaning properties also substantially reduce maintenance and operating costs of solar panels.

Supremecoat Solar Panel Coating repels water, soil, and stains for improved efficiency. Our long-lasting protection keeps solar panels cleaner and efficient in between washings and is suitable for application during or after installation. This ceramic solar panel coating protects panel glass from erosion and staining from salt spray or mineral deposits. Able to endure harsh conditions from sub-zero to extremely hot environments these coatings can be used on solar mirrors as well.

“Our finest made solar panel treatment system is now available. Following years of extensive research and testing, your solar panels will benefit from the advancements in ceramic treatment technology”

Benefits of Supremecoat Solar

Water Repellent

Supremecoat Solar is super-hydrophobic which makes rain just roll off your solar panel.

Longevity

Supremecoat Solar is highly durable and will provide up to 4 years* of protection.

Clear Coating

Supremecoat Solar treatment is 100% optically clear allowing all possible light through.

Frost Resistant

With Supremecoat Solar, snow and ice can be easily removed.

Better Efficiency

Supremecoat Solar treatment reflects less sunlight increasing efficiency by 3-6%.

* To gain up to 4 years protection, the product MUST be applied in accordance with Supremecoat's application guidelines. Upon application an authenticity certificate will be supplied to the solar panel owner.
